PROFESSIONAL SUMMARY

Results-oriented Data Engineer and Cybersecurity/PKI professional with over 2 years' proven experience in designing and automating ETL pipelines, managing secure PKI infrastructures, optimizing SQL queries, and building interactive dashboards. Skilled in Python, SQL, Azure Data Factory, AWS, GCP, Tableau, Power BI, OpenSSL, Microsoft CA, HSMs, Node.js, and React.js to deliver scalable, secure, and production-ready solutions. Experienced in full-stack web and back-end development, integrating data-driven insights with application architecture for real-time decision-making. Adept at cross-functional collaboration, process optimisation, and ensuring compliance with security standards (PCI DSS, FIPS 140-2, ISO 27001). Currently pursuing an MSc in Information Systems, with a focus on cloud-native architectures, secure data systems, and advanced analytics.

TECHNICAL SKILLS

Programming & Development: Python, Java, JavaScript, TypeScript, Node.js, React.js, HTML5, CSS3, RESTful APIs, GraphQL, Bash, PowerShell, PL/SQL, JSON, YAML, Git, Jenkins, Microservices Architecture.

Data Engineering & Analytics: Azure Data Factory, Apache Spark, Databricks, Snowflake, PostgreSQL, MySQL, SQL Server, Google BigQuery, ETL/ELT Pipelines, Data Warehousing, Data Modelling, Data Migration, Query Optimisation, Apache Airflow, Kafka, Tableau, Power BI, Looker Studio, Exploratory Data Analysis (EDA), Predictive Analytics, A/B Testing.

Cloud & Infrastructure: Microsoft Azure, AWS (EC2, S3, RDS, IAM, Glue, Lambda, Redshift), Google Cloud Platform (GCP), Kubernetes, Docker, Terraform, Linux (Ubuntu/CentOS), Windows Server, VMware, CI/CD Pipelines, Infrastructure as Code (IaC).

Cybersecurity & PKI: Public Key Infrastructure (PKI), OpenSSL, Microsoft CA, emCA, TLS/SSL, HSMs, OCSP/CRL, LDAP, Cryptography, Identity & Access Management (IAM), Zero Trust Security, Vulnerability Assessments, Penetration Testing, Security Auditing, Compliance (PCI DSS, FIPS 140-2, ISO 27001, NIST).

UX/UI Design & Tools: Figma, Adobe XD, Wireframing, Prototyping, Usability Testing, Responsive Web Design, UserCentred Design (UCD), Interaction Design, Accessibility (WCAG Standards).

Collaboration & Management: Agile/Scrum, Jira, Trello, Confluence, Microsoft Teams, Slack, Technical Documentation, Stakeholder Management, Procurement & Cost Optimisation, Cross-Functional Team Leadership.

PROFESSIONAL EXPERIENCE

Data Analytics Consultant Jan 2025 - Present 3BROS BURGERS LIMITED | Portsmouth, UK

- Built and optimised SQL-driven data models and dashboards in Excel, Google Sheets, and Power BI, reducing sales forecasting errors by 20%.
- Designed automated ETL-style pipelines with cloud-based scripts (Python & Google Cloud), cutting manual reconciliation work by 40%.
- Conducted POS dataset analysis using SQL, identifying efficiency gaps and enabling a 15% daily operational improvement.
- Integrated vendor APIs with POS systems to maintain 99% uptime and real-time transaction monitoring.
- Developed cloud-enabled digital checklists and Google Forms, improving compliance readiness and reducing paper use by 80%.
- Delivered monthly KPI reviews with SQL-based insights, influencing inventory and workforce planning.
- Led cost-control initiatives through data analysis in procurement, reducing OPEX by 10% across two quarters.
- Acted as cross-functional coordinator, aligning IT, operations, and finance through data-driven workflows.

Cybersecurity Analyst Feb 2024 - Aug 2024 Randstad India | Hyderabad, India

- Automated certificate lifecycle processes using Microsoft CA, OpenSSL, and emCA, reducing issuance turnaround by 60% and strengthening digital trust for financial clients.
- Designed and executed security log audits, identifying vulnerabilities and applying 20+ quarterly OS patches that sustained 99.99% system uptime across banking infrastructures.
- Enhanced monitoring for hybrid Linux/Windows environments with proactive scripting, reducing downtime by 30% and improving response times to anomalies.
- Developed PKI compliance frameworks aligned with RBI and ISO guidelines, accelerating secure digital signature adoption across 50+ banking institutions.
- Built incident response scripts in Bash and PowerShell to improve resilience drills, achieving 100% recovery validation for critical cryptographic keys.
- Delivered cybersecurity awareness workshops that improved policy compliance by 35% among partner banks, reducing risks of phishing and misconfiguration.
- Authored SOPs and cryptographic policy documentation, standardising operational practices and ensuring readiness for audits and external reviews.
- Collaborated with IT and SOC teams to align PKI operations with wider cybersecurity posture, enhancing compliance with PCI DSS and FIPS 140-2.

Application Support Analyst Jul 2022 - Jan 2024 Bheem Technologies | Hyderabad, India

- Supported 200+ end-users monthly by troubleshooting web and desktop applications using SQL queries, log monitoring, and remote desktop tools, consistently achieving 95% satisfaction scores.
- Optimised incident handling by introducing ticket categorisation and escalation flows in Zoho CRM, reducing average resolution time by 30%.
- Diagnosed recurring application performance issues through root cause analysis and database tuning, enabling a 25% drop in repeat complaints and smoother client experience.
- Automated daily health checks and system monitoring tasks with scripts, improving uptime reliability and preventing production downtime.
- Collaborated with developers to replicate and resolve application defects, driving a 15% stability improvement in customer-facing platforms.
- Authored 50+ technical documents and knowledge base guides, reducing repetitive L1 queries by 18% and streamlining support workflows.
- Ensured compliance with security and patching standards by maintaining logs, applying updates, and monitoring access permissions, improving audit readiness by 20%.
- Mentored new analysts in SQL troubleshooting, ticket workflows, and documentation practices, accelerating onboarding and raising productivity by 25%.

PROJECTS

PKI Certificate Automation Tool

- Engineered an SSL/TLS certificate lifecycle automation framework with Bash, Python, and OpenSSL, integrated into banking PKI systems to cut manual issuance and renewal effort by 70%.
- Configured HSM-based key storage and automated key provisioning pipelines, ensuring compliance with PCI DSS and FIPS 140-2 while safeguarding private key protection.
- Designed deployment scripts for certificate distribution across hybrid Linux/Windows servers, reducing downtime risks and strengthening digital trust for 50+ institutional endpoints.

ESRS Scooter Rental System

- Developed a modular role-based web platform with Node.js, SQL, and JavaScript, enabling secure authentication, CRUD workflows, and transaction history tracking.
- Optimised back-end schema design with ER modelling and indexing, improving query execution speeds by 40% for real-time dashboards.
- Integrated secure payment and booking modules, processing 100+ transactions while ensuring consistency and integrity in SQL databases.

Air Pollution & Health Mortality Dashboards

- Built interactive Tableau dashboards with WHO and PM2.5 datasets, enabling real-time visualisation of pollution- driven health outcomes.
- Applied statistical forecasting and geo-analytics in Tableau and Python, increasing prediction accuracy of mortality trends by 85% for policy decision support.
- Published automated reports and KPI-driven dashboards tailored for executives, helping institutions identify hotspots and allocate resources effectively.

User-Centred Mobile App

- Designed a mobile navigation app prototype in Figma, leveraging wireframing and UX research to map GPSbased event locations.
- Conducted usability testing with sample users, refining navigation flows and boosting usability scores by 30%.
- Applied accessibility-first UI principles in layouts, ensuring inclusive design and intuitive interactions for both general and differently-abled user groups.

EDUCATION

MSc in Information Systems — Sep 2024 - Sep 2025
University of Portsmouth | Portsmouth, UK

B.Tech in Electronics and Communication Engineering — Jun 2018 - Aug 2022
Swarna Bharathi Institute of Science and Technology | Khammam, TS, India
